3 Easy Steps To Deliver Chronic Care Management For Your Practice

1. CONSENT

In order to bill for CCM, providers must obtain the patient's written consent, confirming that the following has been explained to the beneficiary.

- An over view of CCM
- How the CCM service may be accessed
- Only one provider can provide CCM services at a time
- Information will be shared with all of the patient's providers
- The patient can terminate the CCM service at any point in time to by revoking consent
- The patient will be responsible for any associated copayment or deductions.

2. WE PROVIDE CERTIFIED EMR

Any provider billing for CCM is required to use technology, which for 2015, includes an EMR that satisfies the 2010 and 2014 criteria of the EMR Incentive Program. Some exceptions apply.

3. THE CARE PLAN

At the core of the CCM code, providers must maintain a regularly updated, electronic care plan that is based on an assessment of the patient's needs (short & long-term plan)

- Medication management, including current medication list, any allergies, medication compliance and reconciliation and oversight of patient self-management.
- Symptom management and planned interventions
- A problem list with expected outcome and prognosis and treatment goals.
- Accessible community and social services.

COMPLIANCE SERVICES WE DELIVER

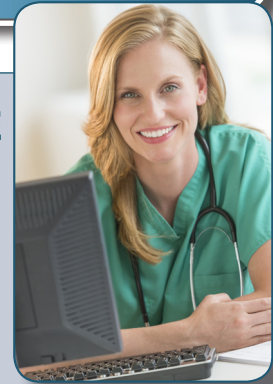

Health Assistants deliver a comprehensive medication adherence program that will help keep patients healthy and reduce hospital stays and doctor visits.

Health Assistants spend a minimum of 20 minutes per patient per month assisting with care coordination tasks.

Health Assistants are available 24/7 by phone, online and through in-app messaging to help patients with chronic care issues and care tasks.

Health Assistants facilitate care transitions, document the information and keep all members of the care team up-to-date.

Portal for families to access and review information, review before office visits and to respond notifications.
